## FLOWFRESH - antimicrobial flooring

## A Fresh Approach to Flooring

The antimicrobial technology found in the Flowfresh polyurethane flooring range is based on the natural ability of silver to inhibit the growth of a wide range of harmful microbes.

In Flowfresh floors made with Polygiene®, silver ions continuously migrate to the surface where they effectively suppress microbial growth.

This activity provides protection 24 hours a day, 7 days a week throughout the normal lifespan of the floor.

In addition, Polygiene® continues to work even if the floor becomes worn or damaged, providing a significant advantage over other antimicrobial technologies.

Polygiene® is not a substitute for cleaning, but should be regarded as a complement to regular hygiene practices.

1. The silver ions are homogenously distributed throughout the floor.
2. The silver ions migrate to the surface.
3. The silver ions inhibit the bacteria on the surface by penetrating cell membranes.

## Flowfresh Accreditations

Flowfresh has been tested to the highest of standards to ensure that it remains the ultimate flooring choice for environments requiring hygiene and durability.\*

### Antimicrobial tests and consultancy performed in Europe:

(Test method used - JIS Z 2801)

- Medical Institute for Microbiology, University of Milan, Italy.
- Virology Institute, University of Catania, Italy.
- SIK Institute, Sweden.
- Lawlabs, UK.
- IMSL, UK.

### Flowfresh tests and consultancy performed in Europe:

- Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung, Germany.
- The Campden & Chorleywood Food Retail Association, UK.
- Centre Scientifique et Technique du Bâtiment, France.
- National Institute of Hygiene, Poland.

\*Third Party Test Certification available on request.

## Bacterial Resistance

Flowfresh protects against a number of bacteria, yeast and mould and has been scientifically proven to inhibit bacterial growth by up to 99.9% in most cases.

SARS-CoV	3	Salmonella typhi	3
MRSA	3	Enterococcus faecalis	3
E-coli	3	Staphylococcus aureus	3
Listeria	3	Streptococcus pyogenes	3
C.difficile	3	Pseudomonas aeruginosa	3
Proteus vulgaris	3	Campylobacter	3

## Chemical Resistance

Flowfresh offers excellent chemical resistance to sugars as well as the majority of organic and inorganic acids used in manufacturing processes.\*

Hydrochloric Acid	3	Methanol	3
Sulphuric Acid	3	Sugar Syrups	3
Citric Acid	3	Caustic Soda	3
Acetic Acid	3	Petrol	3
Lactic Acid	3	Oil Ingredients	3
Ethanol	3	Detergents	3

\*A chemical resistance chart is available on request.

# Flowfresh MF

## Extremely tough polyurethane-concrete flooring with a smooth finish

Flowfresh MF is a medium-duty polyurethane-concrete flooring system with a smooth finish. Flowfresh MF offers long term durability with the benefit of an easy to clean finish for environments such as dry processing, powder processing and packaging. This chemical resistant floor is typically installed between 3/16" and 1/4". Flowfresh MF with Polygiene® is the ultimate in smooth hygienic floors.

**HYGIENIC** - Contains a silver ion based antimicrobial additive that inhibits bacterial growth by up to 99.9%.

**HEAT RESISTANCE** - Resistant up to 200°F.

**EASILY CLEANED** - Joint-free surface eliminates the cracks and crevices where dirt can dwell.

**VIRTUALLY ODOR FREE** - Low odor makes it possible to keep adjacent work areas open during installation.

**CHEMICAL RESISTANCE** - Resistant to the majority of inorganic and organic acids used in the manufacturing process.

### Colors: Flowfresh MF

### Technical Profile: Flowfresh MF

#### Compressive Strength

ASTM C 579: 7250 psi

#### Flexural Strength

ASTM C 580: 2900 psi

#### Tensile Strength

ASTM C 307: 1740 psi

#### Impact Resistance

ASTM D 2794: No visible damage or deterioration at minimum 160 in-lb

#### Temperature Resistance

Heat Resistance: 200°F

#### Water Absorption

ASTM C 413: <0.1%

#### Abrasion Resistance

ASTM D 4060: (C17 wheel, 1,000 cycles) 0.07g loss

#### Adhesion

ASTM D 4541: 400 psi / 100% concrete failure

#### Coefficient of Thermal Expansion

ASTM C 531:  $2.2 \times 10^{-5}$  in/in/°F

#### Modulus of Elasticity

ASTM C 469:  $1.7 \times 10^5$

#### Coefficient of Friction

ASTM D 2047: Passes ADA recommendations

#### Application Suitability

Dry Process (Med Traffic)	✓
Dry Process (Heavy Traffic)	✓

Also available Flowcrete MF (without Polygiene®). ESD grades available on request. The applied colors may differ from the examples shown. For a full color chart and sample, please contact your local Flowcrete office.

# Flowfresh SR & SRQ

## Slip-resistant polyurethane-concrete flooring with optional decorative finish

Flowfresh SR and SRQ are heavy duty, slip resistant polyurethane-concrete flooring systems. They offer long term durability in environments such as kitchens and wet process areas. These slip-resistant floors provide a variable degree of slip resistance that can be tailored to the needs of the environment. They are typically installed at 1/4". Flowfresh SR and SRQ with Polygiene® are the ultimate in slip-resistant hygienic floors.

**HYGIENIC** - Contains a silver ion based antimicrobial additive that inhibits bacterial growth by up to 99.9%.

**HEAT RESISTANCE** - Resistant up to 200°F (SR) & 180°F (SRQ).

**MAXIMUM SLIP RESISTANCE** - Surface profile can be adjusted to provide varying degrees of slip resistance.

**VIRTUALLY ODOR FREE** - Low odor makes it possible to keep adjacent work areas open during installation.

**CHEMICAL RESISTANCE** - Resistant to the majority of inorganic and organic acids used in the manufacturing process.

### Colors: Flowfresh SR & SRQ

### Technical Profile: Flowfresh SR & SRQ

#### Compressive Strength

ASTM C579: 8128 psi

#### Flexural Strength

ASTM C580: 2900 psi

#### Tensile Strength

ASTM C307: 1450 psi

#### Impact Resistance

ASTM D 2794: No visible damage or deterioration at minimum 160 in-lb

#### Temperature Resistance

Heat Resistance: SR: 200°F  
SRQ: 180°F

#### Water Absorption

ASTM C 413: <0.1%

#### Abrasion Resistance

ASTM D4060: (C17 wheel, 1,000 cycles) 0.05g loss

#### Adhesion

ASTM D 4541: 400 psi / 100% concrete failure

#### Coefficient of Thermal Expansion

ASTM C 531:  $1.5 \times 10^{-5}$  in/in/°F

#### Modulus of Elasticity

ASTM C 469:  $1.7 \times 10^5$

#### Coefficient of Friction

ASTM D 2047: Passes ADA recommendations

#### Application Suitability

\*Flowfresh SRQ is available with a colored quartz finish. The applied colors may differ from the examples shown. For a full color chart and sample, please contact your local Flowcrete office.

# Flowfresh HF & RT

## Heavy duty polyurethane-concrete flooring designed for heavy-duty environments

Flowfresh HF and RT are heavy-duty polyurethane-concrete flooring systems. They offer long term durability in demanding environments such as wet process areas. These trowel applied, chemical resistant floors provide the highest level of thermal shock and impact resistance. They are typically installed between 1/4" - 3/8" depending on the environment. Flowfresh HF and RT with Polygiene® are the ultimate in heavy duty hygienic floors.

**HYGIENIC** - Contains a silver ion based antimicrobial additive that inhibits bacterial growth by up to 99.9%.

**HEAT RESISTANCE** - Resistant up to 250°F.

**CHEMICAL RESISTANCE** - Resistant to the majority of inorganic and organic acids used in the manufacturing process.

**THERMAL SHOCK RESISTANCE** - Withstands extreme temperatures while in service and during cleaning.

**VIRTUALLY ODOR FREE** - Low odor makes it possible to keep adjacent work areas open during installation.
